

MEDITERRANEAN WALL

TECHNICAL INFO SHEET:

Custom-made solutions are possible.

THICKNESS:

15/18 cms

WEIGHT:

8-13 Kgs (per M2)

SUPPORT - RELATED MATERIAL:

PVC FOAM 3mms EUROCLASS: B, s2, d0 (EN 13501)
3mms according to the law en 13501-1

PLANTS:

Arboreal Ivy, Cinerea Eucalyptus, Parchment Fern, Tree Fern, Salal.

Other plant essences available on request.

We usually do not always use all the different types of essences and fragrances we have available. It not only depends upon the requests of our clients but also on the specific type of conditions of the setting and environment in which the Mediterranean Wall will be placed and hung.

The natural plants are selected and picked carefully keeping constantly in mind the preservation of the natural habitat they originally grow in.

Treating the plants we choose with our non-toxic products and anti-bacterial agents, enables us to avoid causing any pollution during our environmental-friendly stabilizing process. In this way we manage to obtain perfectly natural and long-lasting preserved plants without any harmful consequences at all.

WALL INSTALLATION AND MOUNTING:

Wall anchors and dowels mounted with self-tapping screws.

Plasterboard wall panels with drywall screw fittings.

PACKAGING:

Recycled cardboard boxes.

STABILIZING BLEND FOR PRESERVED PLANTS:

100% eco-friendly and biodegradable glycerine.

PRECAUTIONS:

Do not expose preserved plants or green walls to direct sunlight for a long period of time.

They are strictly to be kept indoors and preferably not behind a glass window pane to avoid the direct rays of sunlight which could cause the withering of the plants and the gradual fading of their vivid colours.

We strongly recommend not to place preserved plants near heaters or any other type of heating elements.

Avoid watering, wetting, spraying or washing the plants.

Make sure the humidity rate in the setting is always kept between 40 and 70%.

We advise you to regularly dust the plants preferably using a hairdryer.

The faint scent of undergrowth you will smell at first after mounting the Mediterranean Wall is perfectly normal and natural, there is therefore no reason to complain or to start worrying.

We also kindly remind you that in time a very slight fading of the colour shades is also to be expected
